

异常日志： No data or no sasl data in the stream

问题描述

HiveServer2服务在运行时经常抛出如下异常日志：

```
[HiveServer2-Handler-Pool: Thread-53]: Error occurred during processing of message.  
java.lang.RuntimeException: org.apache.thrift.transport.TSaslTransportException: No data or no sasl  
data in the stream  
    at  
org.apache.thrift.transport.TSaslServerTransport$Factory.getTransport(TSaslServerTransport.java:219)  
  
    at org.apache.thrift.server.TThreadPoolServer$WorkerProcess.run(TThreadPoolServer.java:269)  
    at java.util.concurrent.ThreadPoolExecutor.runWorker(ThreadPoolExecutor.java:1142)  
    at java.util.concurrent.ThreadPoolExecutor$Worker.run(ThreadPoolExecutor.java:617)  
    at java.lang.Thread.run(Thread.java:748)  
Caused by: org.apache.thrift.transport.TSaslTransportException: No data or no sasl data in the  
stream  
    at org.apache.thrift.transport.TSaslTransport.open(TSaslTransport.java:328)  
    at org.apache.thrift.transport.TSaslServerTransport.open(TSaslServerTransport.java:41)  
    at  
org.apache.thrift.transport.TSaslServerTransport$Factory.getTransport(TSaslServerTransport.java:216)  
  
... 4 more
```

解决方法

CDH5中

在搜索栏搜“HiveServer2 日志记录高级配置代码段（安全阀）”，添加如下配置：

```
log4j.appender.RFA.filter.1=org.apache.log4j.filter.ExpressionFilter  
log4j.appender.RFA.filter.1.Expression=EXCEPTION ~=  
org.apache.thrift.transport.TSaslTransportException  
log4j.appender.RFA.filter.1.AcceptOnMatch=false
```

参考

<https://cloud.tencent.com/developer/article/1176657>

CDH6中

```
logger.TSasl.name = org.apache.thrift.server.TThreadPoolServer  
logger.TSasl.level = off
```
