

#跳过错误批量安装所有插件

```
ansible new -m shell -a "while read requirement; do sudo pip3.5 install -i http://192.168.25.200/ali --trusted-host 192.168.25.200 $requirement; done < /root/requirements.txt "
```

批量安装完所有包后， 但是tensorflow不能用

```
AttributeError: module 'tensorboard.plugins.pr_curve.summary' has no attribut
```

解决办法

```
python3.5 -m easy_install --version  
pip3.5 install -i http://192.168.25.200/ali --trusted-host 192.168.25.200 --  
upgrade setuptools==41.0.0
```

```
pip3.5 uninstall tensorflow  
pip3.5 uninstall tensorboard  
pip3.5 install -i http://192.168.25.200/ali --trusted-host 192.168.25.200  
tensorflow==1.14.0
```

测试 是否成功

```
ansible newhost -m shell -a "python3.5 -c 'import tensorflow as tf' "
```
