

# Spark, Impala, Hive 设置队列

```
Impala:      SET request_pool=development;
```

```
Hiveserver2:  set mapreduce.job.queueName=xy_yarn_pool.development ;
```

```
hive --hiveconf mapreduce.job.queueName=queue1
```

```
spark2-shell --master yarn --queue bf_yarn_pool.development
```

```
spark-submit --master yarn --queue wa
```
